Professional Summary

Accomplished Cloud Architect and Lead DevOps Engineer with over 10 years of experience designing and optimizing high-availability, distributed systems. Expert in AWS, Kubernetes, Kafka, Redis, and PostgreSQL, with a proven track record of architecting scalable cloud-native infrastructures for IoT, HR, e-commerce, and AI platforms. Skilled in leading technical teams, establishing CI/CD pipelines, and driving innovation. Adept at translating business requirements into robust architectures, with a strong focus on performance, security, and observability.

Key Technical Skills

- **Languages & Frameworks:** Python, Bash
- **Microservices & APIs:** REST, API Gateway, Service Discovery (Kubernetes-based)
- **Event-Driven Architecture:** Apache Kafka (Topic Design, Producer/Consumer), Amazon SQS
- **Databases:** PostgreSQL (HA with Patroni), MySQL (Multi-master, Group Replication), Redis (Caching, Session), MongoDB
- **Cloud & DevOps:** AWS (EKS, ECR, S3, CloudFront, ALB, SES, Lambda, CodePipeline), VNG Cloud, Docker, Kubernetes (K8s), ArgoCD, GitLab Runner, Jenkins

- **Observability:** Prometheus, Grafana, CloudWatch, Performance Optimization
 - **Security:** SOX, ISO 27001, Zero Trust, OAuth 2.0, JWT, DDoS Protection, WAF
 - **Networking:** Anycast DNS, Load Balancing (ALB, Nginx), Network Security
 - **CI/CD:** GitLab CI, Github Action, Jenkins, ArgoCD, SonarQube, AWS CodeBuild
 - **Domains:** ERP, IoT, E-Commerce, F&B Systems
-

Professional Experience

Lead System/DevOps Engineer

VNG Corporation | Ho Chi Minh City, Vietnam | Jun 2020 – Present

- Led the DevOps team for VNG-DB (GreenNode) and architected infrastructure for all VNG-DB products, including Corp (HR/IT/FA), Veka (vcloudcam), VNG Cloud, GreenNode, OCR Platform, AI Platform, InfiniX, and Uprace, achieving 99.9% uptime across high-concurrency workloads.
- Managed corporate-wide Office 365 cloud operations, implementing Azure AD sync and Zero Trust architecture to secure access for thousands of users.
- Designed and optimized microservices-based infrastructure using Kubernetes, Kafka, and Redis, enabling scalable data streaming, caching, and real-time processing for diverse product portfolios.
- Established enterprise-grade CI/CD pipelines with GitLab Runner, ArgoCD, and Jenkins, integrating SonarQube, reducing deployment time by 40%.
- Built observability stack with Prometheus and Grafana, providing real-time monitoring and performance insights across all VNG-DB products.
- Support get ISO 27001, SOX, SOC2 certification for VNG-DB product.
- Lead a team of 8 DevOps engineers, guiding technical designs and fostering a culture of innovation.

Senior System/DevOps Engineer, Team Leader

VNG Corporation | Ho Chi Minh City, Vietnam | Apr 2017 – Jun 2020

- Led a 2-engineer team to manage enterprise IT infrastructure, focusing on high-availability.
- Architected PostgreSQL HA with Patroni and MySQL multi-master replication, ensuring zero data loss.
- Containerized HR/IT systems using Docker, improving deployment efficiency and modularity.
- Designed 200TB enterprise storage (TrueNAS/FreeNAS) with Azure authentication for secure access.
- Migrated systems from Google Workspace to Office 365, implementing Azure AD sync and Zero Trust architecture.
- Established CI/CD pipelines, enhancing release cycles by 30%.

Senior System Engineer

VNG Corporation | Ho Chi Minh City, Vietnam | Apr 2015 – Apr 2017

- Developed mail relay and LDAP systems for 2000+ users, ensuring secure communication.
- Implemented a live streaming system for VNG events, supporting 2000 viewers with Docker.
- Deployed Guacamole clientless remote desktop gateway, improving access security.
- Built corporate websites using Docker, ensuring high availability.

System Administrator

VNG Corporation | Ho Chi Minh City, Vietnam | Apr 2014 – Apr 2015

- Implemented HR systems using Odoo, streamlining employee management.
- Developed CI/CD pipelines, reducing manual deployment by 50%.

System Administrator

YeuTheThao.com | Ho Chi Minh City, Vietnam | Aug 2012 – Jan 2014

- Built high-traffic website infrastructure for 1000+ CCU using Nginx and Linux servers.
 - Implemented DDoS protection with iptables, Nginx modules, and fail2ban.
 - Managed on-premises mail and Active Directory for 100 employees.
-

Education

Bachelor's Degree in Systems Engineering

Sai Gon University | Ho Chi Minh City, Vietnam | 2008 – 2012

Certifications

- AWS Certified Solutions Architect – Associate
(<https://www.credly.com/badges/af54d66f-028e-4d7f-af9a-d78703ae970c>)
-

Notable Projects

Cloudverse Platform (100% AWS)

- **Role:** Lead DevOps/Architect
- **Tech Stack:** AWS (EKS, S3, ALB, Lambda, RDS, ElastiCache, CloudWatch), Kubernetes, Kafka, Redis
- Architected a scalable, microservices-driven platform on AWS, using EKS for container orchestration and S3 for storage.
- Designed event-driven workflows with Kafka and Lambda for real-time data processing.
- Implemented CI/CD pipelines with AWS CodePipeline and CodeBuild, achieving 50% faster deployments.
- Optimized performance with Redis caching and RDS (PostgreSQL), reducing latency by 30%.
- Ensured 99.95% uptime via ALB load balancing, auto-scaling, and CloudWatch monitoring.

Kubernetes-Based IoT Platform

- **Role:** Lead Architect
- **Tech Stack:** Kubernetes, Message Queue (ActiveMQ, Mosquito), Redis, PostgreSQL
- Designed a scalable IoT platform with microservices, processing real-time data for thousands of devices.
- Achieved 99.9% uptime through robust monitoring and auto-scaling.

Veka (vcloudcam) Infrastructure

- **Role:** Lead DevOps Engineer
- **Tech Stack:** Kubernetes, S3, Load Balancing, RTMP Streaming, Gitlab Runner (CI/CD)
- Architected Kubernetes infrastructure for a cloud camera system, integrating storage and streaming.

OCR/AI Platform

- **Role:** Lead DevOps
- **Tech Stack:** Kubernetes, Redis, Message Queue, OCR AI Model, Minio, Jenkins, GitLab
- Designed, built, and deployed Kubernetes infrastructure for OCR and AI model deployment, optimizing performance for high-throughput processing.
- Implemented CI/CD pipelines with Jenkins and GitLab, automating AI model updates and reducing deployment time by 30%.
- Configured Minio for scalable object storage and Message Queues for efficient data pipelines, enhancing OCR processing reliability.
- Ensured 99.9% uptime and scalability through Prometheus-based monitoring and auto-scaling configurations.

Dcorp (F&B) Infrastructure (Freelance)

- **Role:** Architect/DevOps

- **Tech Stack:** Kubernetes, APISIX, Keycloak, MySQL, PostgreSQL, GitLab Runner, Kafka, Redis
- Consulted, designed, and deployed Kubernetes-based infrastructure for FnB operations, integrating APISIX for API gateway and Keycloak for secure authentication.
- Built CI/CD pipelines using GitLab Runner, automating deployments and reducing release cycles by 35%.
- Architected high-availability MySQL and PostgreSQL clusters, ensuring zero data loss and seamless scalability.
- Implemented Kafka for real-time event streaming and Redis for caching, optimizing system performance by 25%.
- Ensured 99.9% uptime through robust monitoring and auto-scaling configurations.

Payment System for U.S. Nails Chain (Freelance)

- **Role:** Architect/DevOps
 - **Tech Stack:** AWS (EKS, ECR, ALB), Kubernetes, Kafka, Redis, PostgreSQL, GitHub Actions, Grafana Tempo
 - Architected and deployed a 100% AWS-based payment system using EKS for container orchestration, ensuring high availability and scalability for a U.S. retail chain.
 - Implemented CI/CD pipelines with GitHub Actions, automating deployments and reducing release cycles by 40%.
 - Designed event-driven architecture with Kafka for real-time transaction processing and Redis for caching, improving performance by 30%.
 - Configured PostgreSQL clusters for secure data management and Grafana Tempo for distributed tracing, enhancing system observability.
 - Achieved 99.95% uptime through ALB load balancing and auto-scaling configurations.
-

Additional Information

- **Languages:** Vietnamese (Native), English (Intermediate)
 - **Soft Skills:** Technical Leadership, Team Mentoring, Stakeholder Communication, Problem-Solving
 - **Interests:** Cloud-Native Architectures, Microservices, Open-Source Technologies
-
